Objective

A DevOps and Cloud Engineer with hands-on experience in **containerization, CI/CD pipelines, cloud infrastructure (AWS), and automation**, seeking to build and scale reliable systems. Passionate about solving real-world engineering problems through clean, efficient, and production-ready DevOps practices.

Technical Skills

Languages & Scripting: Python, SQL, Linux/Bash

Cloud & Platforms: Amazon Web Services (EC2, S3, IAM, VPC), Microsoft Azure, GCP

DevOps Tools: Docker, Kubernetes, Terraform, Jenkins, Git, CI/CD Pipelines, Prometheus, Grafana

Software Engineering: Computer Networking, Operating Systems, Distributed Systems, Load Balancers, AI Fundamentals, Software Development Life Cycle

Work Experience

ARCHON Platform 3 Solutions

Dec 2025 – Mar 2026

DevOps Intern

- Worked on DevOps practices including **Docker** for containerization, **Terraform** for infrastructure provisioning, and **CI/CD pipelines** for automated build and deployment.
- Gained hands-on experience with **AWS** services such as EC2, S3, IAM, and VPC for deploying and managing scalable cloud environments.
- Performed **Linux system administration** tasks including server configuration, user management, and networking.
- Implemented monitoring and visualization using **Prometheus** and **Grafana** to track system performance and ensure reliability.

SARSE Technologies

Oct 2025 – Dec 2025

Testing Intern

- Tested the **VOTO Ecommerce Web Application** to ensure smooth functionality and a seamless user experience.
- Created and executed test cases for product browsing, cart, checkout, and payment flows.
- Identified and reported bugs, collaborating with developers to resolve issues efficiently.
- Performed **re-testing** to verify all fixes were stable and deployment-ready.

Projects

Metadata-Driven CI/CD Pipeline

[Repo Link](#)

- Built a **CI/CD pipeline** using **Jenkins** to validate required files before deployment, preventing broken builds.
- Wrote a **Python** script to automate file validation and enforce deployment prerequisites.
- Used **Docker** to test the application locally before pushing changes to production.
- Set up a safer deployment flow to reduce errors and make updates smoother across environments.

AI Resume & ATS Job Match Analyzer

[Live Demo](#)

- Co-developed a resume analysis tool using **Python** and **NLP** for ATS compatibility and skill-gap evaluation.
- Handled deployment by containerizing the app with **Docker** for consistent and portable execution.
- Added a fallback mechanism (**Gemini + Groq**) to maintain availability if one API goes down.
- Hosted the application on Google Cloud Compute Engine with proper configuration for reliable performance and easy access.

Sathyabama AI Chatbot

[Live Demo](#)

- Co-developed a chatbot using **Flask** to handle real-time student queries with stable API responses.
- Managed deployment and environment consistency using **Docker** across development and production.
- Added error handling and retries for reliable **Google Gemini API** communication.
- Deployed the application on GCP Compute Engine using Docker, ensuring consistent and scalable runtime environments

Education

Sathyabama University, Chennai

Jun 2024 – May 2026

Master of Computer Applications

6.78 CGPA

Vels University, Chennai

Jun 2021 – May 2024

B.Sc in Computer Science

7.52 CGPA

Certifications

AWS DevOps Certification

Oct 2025 – Apr 2026

FITA Academy, Chennai

- Built practical expertise in AWS services (EC2, S3) and implemented CI/CD pipelines using Jenkins for automated application deployments
- Developed a strong foundation in DevOps practices, including Docker-based containerization, monitoring, and reliable deployment workflows
